

Evidence-based interventions for preventing reading failure

Adrea Truckenmiller, Ph.D., NCSP
Ohio School Psychologists Association spring meeting

Disclaimer

Information and materials mentioned or shown during this presentation are provided as resources and examples for the viewer's convenience. The inclusion of specific interventions or assessments is not intended as an endorsement by the Florida Center for Reading Research.

The presenter has no financial interest in the materials mentioned in the presentation. However, several researchers at FCRR do have a financial interest in Lexia's RAPID assessment, the CTOPP, and the TOSREC.

2

Post questions

http://padlet.com/adrea_truckenmi/OSPA

3

Objectives

- Analyze the developmental components of reading from Kindergarten through grade 10
- Identify critical considerations for assessment data and choosing instructional practices at the universal, supplemental, and intensive tiers, including for special populations like English learners
- Match assessment data with evidence-based instruction that are identified by the What Works Clearinghouse and FCRR's student center activities
- Identify the critical practical components of implementing evidence-based instruction

4

Components of Reading

A fresh look at the big 5

5

The Big 5

Phonological awareness	• Ability to hear, identify, and manipulate the individual sounds in spoken language.
Phonics	• Understanding that there is a predictable relationship between the sounds of spoken language and letters in written language.
Fluency	• Ability to read connected text with accuracy, speed, and proper expression
Vocabulary	• Words we must know to communicate effectively (listening, speaking, reading, & writing)
Comprehension	• Mental representation of the text

6

National Reading Panel, 2000

Phonological awareness

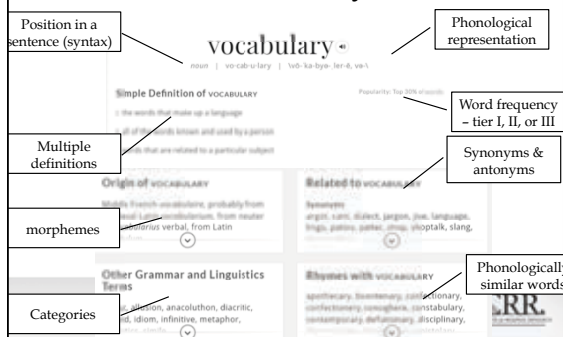

7

Phonics

10

Fluency

The previous day he had discovered a cave, and today he wanted to explore it. Long, thick weeds hid the mouth of the cave. Alan pushed the weeds to the side and looked into the cave. It was too dark to see anything. He turned on his flashlight and looked inside again. The cave was only five feet high. Alan just fit when he stepped inside. Alan put his hand flat on the wall. It would protect his head from the roof of the cave. He shined his flashlight around the cave. It was dry and cold inside. He walked around and explored the cave. He dropped popcorn behind him as he walked. He found old shoes in the cave. The cave walls displayed several paintings of animals.

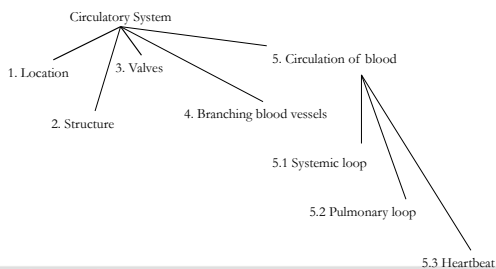

Alan didn't know what he might find. He had dreamed about finding a lost treasure or some buried gold. But he knew he was more likely to find only mud and rocks. As he walked his way deeper into the cave, he discovered small waterfalls and sharp points of rock hanging from the ceiling.

tell	first

10

Comprehension: text structure

11

Kintsch & Rawson, 2005

Quiz

- How many phonemes are in the word 'through'?
- What would the word be if you say the word 'enough' and then reverse the order of the sounds?
- How many morphemes are in the word 'disassemble'?
- What must every spoken syllable in English have?
 - an accent
 - a vowel sound
 - a consonant
 - a letter combination
- What is the rule for using a 'ck' in spelling?
- During reading, analysis of word structure would be a useful strategy for understanding which of the following words?
 - discriminate
 - inalterable
 - perspective
 - institution
- Which pair of words most clearly exemplifies the concept of antonyms?
 - morning - evening
 - parent - child
 - mean - nice
 - whole - broken
- Fluency serves as bridge between which two processes?
- What are the 3 properties of fluent reading?
- Name two expository text structures.
- Which of the following is particularly useful for recalling details from a narrative text?
 - K-W-L
 - summarizing
 - a story map
 - predicting

12

Binks-Cantrell, Joshi, & Washburn, 2012
Carlisle, Correnti, Phelps, & Zeng, 2009

What have we learned since 2000? Simple view of reading

Recognizing words in text & sounding them out phonemically

The ability to understand language

The ability to read and obtain meaning from what was read.

Gough & Tunmer, 1986
Wagner et al., 2014

FCRR
Florida Center for Reading Research

18

Defining new(ish) concepts

- syntax, or grammar**, is the set of rules governing the arrangement of words to form meaningful sentences. The rules of syntax include adding the right inflectional endings or suffixes to words (*morphology*), as well as knowing the proper order of words in a statement, question, or command. By the time children are school-age, the vast majority of these rules have been acquired in a native language and have become essential to effective oral communication
- inferential language, or decontextualized language**. This is language that moves beyond the here and now and allows students to predict, hypothesize, reason, problem-solve, or compare and contrast (e.g., discussing what life would have been like if we lived on the Mayflower). The second function is *narrative language*, which students use to organize information in a logical sequence and connect pieces of information through grammatical structures to produce a coherent account (e.g., telling a story about the first Thanksgiving)
- academic vocabulary**, which refers to words that are rarely used in daily conversations but occur often in written text (e.g., *contrast, define, estimate*) and in other school contexts

24

The Academic Language of Disciplines				
	English	Mathematics	History	Science
text type	literary	informational or technical, symbolic, diagrams	expository, argumentative, persuasive	Informational or technical, diagrams
text structure	plot, setting, characterization, point of view, verse, rhyme	sequence, cause and effect, problem and solution, supporting ideas and evidence, graphical features	sequence, cause and effect, problem and solution, author's perspective supporting ideas and evidence, contrasting viewpoints, graphical features	sequence, cause and effect, problem and solution, supporting ideas and evidence, graphical features
author's craft	fiction, dialogue, symbolism, imagery, irony, figurative language	rhetorical structure, examples, logical arguments	figurative language, rhetorical structure, examples, emotional appeal	rhetorical structure, examples, logical arguments

25

Foorman, 2013

FCRR

Questions

http://padlet.com/adrea_truckenmi/OSPA

30

FCRR

Choosing evidence-based practices in reading

Tier 1 –practice guides & recommendations for differentiated instruction

Tiers 2 & 3 – WWC intervention reports, single study reviews, quick reviews

31

"Enough is already known about adolescent literacy – both the nature of the problems of struggling readers and the types of interventions and approaches to address these needs – in order to act immediately on a broad scale."

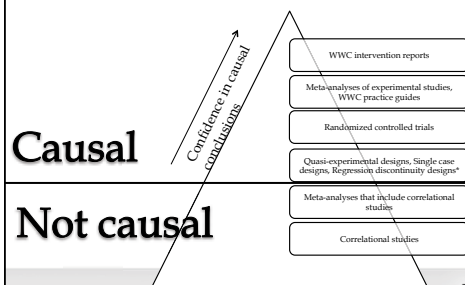

"However, we do yet possess an overall strategy for directing and coordinating remedial tools for the maximum benefit to students at risk of academic failure, nor do we know enough about how current programs and approaches can be most effectively combined."

- Biancarosa & Snow, 2006, p. 3 & 10

32

Evidence is a continuum

33

Using the WWC

- <http://ies.ed.gov/ncee/wwc/default.aspx>
- Choose an intervention report

34

Getting to a definition of evidence-based

Types of studies

Types of effects

35

36

<http://ies.ed.gov/ncee/wwc/>

One definition of evidence-based

WWC term	Definition
Study rating	
Meets standards without reservations	Studies receiving this rating provide the highest degree of confidence that an observed effect was caused by the intervention. Only well-implemented randomized controlled trials that do not have problems with attrition may receive this highest rating.
Meets standards with reservations	Studies receiving this rating provide a lower degree of confidence that an observed effect was caused by the intervention. Randomized controlled trials that are not as well implemented or have problems with attrition, along with strong quasi-experimental designs, may receive this rating.
Intervention effectiveness rating	
Positive effect (++)	2 or more studies show statistically significant positive effects, at least 1 of which meets WWC standards without reservations (i.e., randomized controlled trial)
Potentially positive effects (+)	At least 1 study shows statistically significant or substantively important positive

37

Interpreting WWC Improvement Index

Increase in percentile rank

How-to: Look up the effect size in a z-score table to find the area under the curve. Subtract 0.50 from the area under the curve.
 ES = 0.44
 Area = 0.67
 Improvement index = $(0.67 - 0.50) \times 100\%$
 Improvement index = 17%

Interpretation: If the average student in the control condition had received the treatment, that student would have moved from the 50th percentile to the 67th
 *assumes normal distribution & homogeneity of variance

(WWC handbook, page F.10
<http://ies.ed.gov/ncee/wwc/documentsum.aspx?sid=19>)

38

Extent of evidence

- Small
 - Includes only 1 study OR
 - Only 1 school OR
 - Sample size < 350 students (14 classrooms)
- Medium to large
 - > 1 study
 - > 1 school
 - Sample size > 350 students

39

Limitations

- Power is not considered
- Implementation is not considered
- Many relevant constructs do not have measures with high reliability
- Some educational concepts do not have a defined causal mechanism
 - Standards
 - Universal design for learning
- Some instructional approaches are difficult to measure
 - Examples: design studies, talk moves
- RCTs may be inappropriate
 - Ethical reasons
 - Low-incidence phenomenon

40

CAUTION!
 Rank ordering by improvement index is NOT the first & last stop in choosing an intervention

<http://ies.ed.gov/ncee/wwc/findwhatworks.aspx>

41

WWC.org - Improvement Index: high to low

Jump to findings for: Reading comprehension

Intervention	Topic	Improvement Index	Effectiveness Rating	Extent of Evidence
Peer-Assisted Learning Strategies	Children and youth with disabilities (Students with Learning Disabilities)	26	++	Small
Sound Partners	General (Beginning Reading)	21	++	Medium to Large
SpellRead™	General (Beginning Reading)	20	++	Small
Understanding Phonics Instruction™	General (Beginning Reading)	20	++	Small
Project READS™	General (Adolescent)	20	++	Medium to Large
Peer-Assisted Learning Strategies	Literacy (Adolescent)	11	++	Small
Early Intervention in Reading (EIR®)	General (Beginning Reading)	11	++	Small

Intervention Effectiveness Rating

Intervention	Improvement Index (average gain for students)	Effectiveness Rating	Extent of Evidence
Alphabetics	21	++	Medium to Large
Reading comprehension	21	++	Medium to Large
Reading fluency	19	++	Medium to Large
Reading self-efficacy	9	0	Small

Find What Works for these outcomes.

Scope of Research Meeting Standards

Grade: K-1
 Delivery Method: Individual
 Program Type: Supplement
 Grade: Mixed
 Index Derived: Total = all (from study outcomes)
 (Mean Rank = 1.2, Mean = 1.2, Standard = 1.2)

42

Factors affecting improvement index

- Improvement Index reflects the specific design of the studies; **designs vary widely**
- Type of outcome used in the study
 - Researcher-created (e.g., unit test) vs. norm-referenced (e.g., WJ Test of Achievement)
 - Proximal (vocabulary words taught) vs. distal measure (SAT-10 vocabulary)
- Type of comparison group used in the study
 - 'Business as usual' reading instruction prior to 2000 vs. core curriculum with established scope and sequence

43

Questions

http://padlet.com/adrea_truckenmi/OSPA

44

Activity

1. Go to http://ies.ed.gov/ncee/wwc/Publications_Reviews.aspx
 - Search for an intervention used at your school
 - Read the intervention report or single study review
 - Create a summary of the evidence as if a teacher asked you the proven effectiveness of this particular intervention
2. Go to <http://ies.ed.gov/ncee/wwc/findwhatworks.aspx>
 - Based on your school's data, choose an area (e.g., reading comprehension/achievement for adolescents, mathematics achievement) where you need to identify an evidence-based intervention
 - Compare 3 different interventions for best match to your school's needs (student outcome, effectiveness rating, delivery method, various aspects of teaching or training needed, comparison group, population)

45

Activity debrief

- Share summaries
- When browsing interventions, did you notice any other important considerations that others in this group may find constructive?

46

General evidence-based instructional practices

For elementary & secondary students

47

Practice guides

General qualities of instructional practices that have worked across several studies.

Determined by an expert panel's review of studies that meet WWC standards

48

Lessons learned in elementary

- Increase time allocated to vocabulary instruction (academic language).
- Improve quality of letter-sound correspondence instruction through teacher-led lessons on spelling patterns.
- Systematic (scope & sequence) phonics instruction produces significant benefits
- The most effective intervention is prevention in the form of differentiated classroom instruction utilizing assessment
- Highly-informed instructional leaders with a well-articulated long-term (3 years) initiative

49

Foorman, Carlson, & Santi, 2004
Foorman & Moats, 2002

The case for fully guided instruction

Research has provided overwhelming evidence that, for everyone but experts, partial guidance during instruction is significantly less effective than full guidance.

(Clark, Kirschner, & Sweller, 2012, *American Educator*)

50

Adolescent literacy: example

Student team reading & writing

- Partner reading
- Treasure hunts (question guide)
- Word mastery (vocab w/ partner & writing)
- Story retelling
- Story-related writing
- Extension activities (cross-curricular)
- Explicit instruction of comprehension strategies

Business as usual

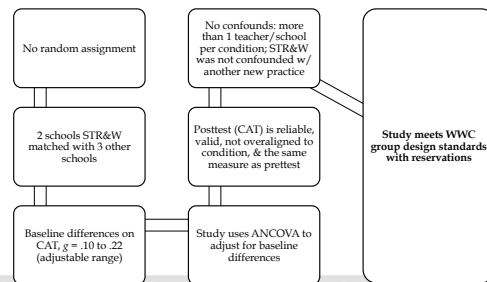

- Separate reading & English classes
- Basal reading series
- Literature anthology

Stevens, R.J. (2003). Student team reading and writing: A cooperative learning approach to middle school literacy instruction. *Educational Research and Evaluation*, 9(2), 137-160.

51

Study rating: example

52

U.S. Department of Education, 2011

Teaching academic language to improve comprehension

AKA oral language, listening comprehension, considerations for teaching English Learners

53

Recommendations

Recommendations	Levels of Evidence		
	Strong Evidence	Moderate Evidence	Minimal Evidence
1. Teach a set of academic vocabulary words intensively across several days using a variety of instructional activities.	♦		
2. Integrate oral and written English language instruction into content-area teaching.	♦		
3. Provide regular, structured opportunities to develop written language skills.			♦
4. Provide small-group instructional intervention to students struggling in areas of literacy and English language development.		♦	

54

Baker, et al., 2014, p. 7

Recommendations also apply to...

- Students in grades 5 through 8
- English Learners
- Economically disadvantaged (high % free/reduced price lunch)
- General education
- Students at-risk for reading achievement

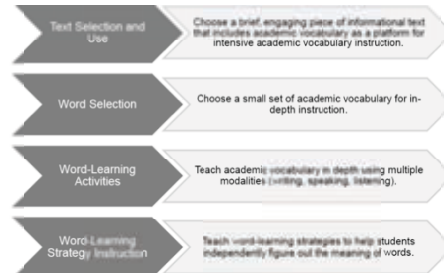

3 additional interventions have studies that meet What Works Clearinghouse standards & support recommendations

55

Truckenmiller, in prep

1. Teach academic vocabulary words

56

IES, May 2014

http://ies.ed.gov/ncee/wwc/pdf/practice_guides/wwc_ellwebinarslides_052114.pdf

1. How to choose words

	Frequently used in the text	Central to understanding the text	Appears in other content areas	Affixes	Multiple meanings and uses	Cross-language potential
Environment	<input checked="" type="checkbox"/>			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
Exhibit	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>		
Impact	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>	
Investigation			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
Option				<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
Pursuit	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			<input checked="" type="checkbox"/>	

57

1. Word-learning activities

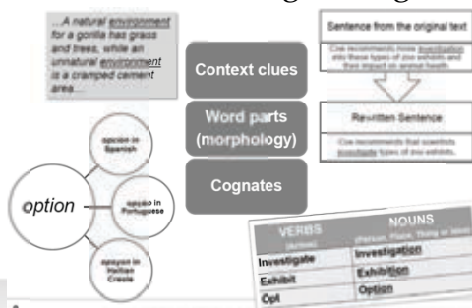

58

IES, May 2014

1. Word-learning strategies

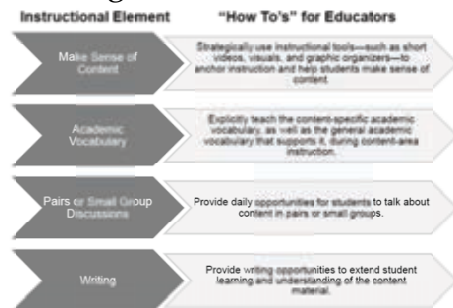

59

IES, May 2014

2. Integrate into content areas

60

IES, May 2014

2. Integrate into content areas

Use everyday language first:

Green plants make a type of sugar as their food by taking in light, water, and gas that humans breathe out.

Then, introduce academic & disciplinary language:

Green plants produce glucose, by taking in photons, water, and carbon dioxide.

Academic language
Disciplinary language

61

Brown, Ryoo, & Rodriguez, 2012; Ryoo, 2009

ECRR
EVIDENCE-BASED CURRICULAR RESEARCH

2. Use videos, with graphic organizers & discussion support

- Pre-teach vocab, discuss vocab & concepts, write & rehearse responses in pairs

- Boycott, refuse, colored section
- Why was Rosa Parks arrested?
- Why did she refuse to give up her seat?
- Choose an adjective to describe her.
- Why do you think she was arrested this time and not previously?

- Compare & contrast

Baker et al., 2014

ECRR
EVIDENCE-BASED CURRICULAR RESEARCH

3. Provide structured writing activities

- Provide content words & transition words to incorporate
- Use graphic organizers
- Provide specific feedback on
 - Content
 - Vocabulary
 - Conventions
- Plan & revise in groups

A graphic organizer titled 'Compare and Contrast Writing Framework'. It includes sections for 'Topic/Context', 'Main Idea/Thesis', 'Supporting Details', and 'Conclusion'. There are also lines for 'Vocabulary Words' and 'Transition Words'.

63

Baker et al., 2014

4. Provide small-group instruction

64

IES, May 2014

ECRR
EVIDENCE-BASED CURRICULAR RESEARCH

4. Scaffolding instruction

- Inferential Question:**
"How would you describe Rosa Parks?"

Teacher Think-Aloud:

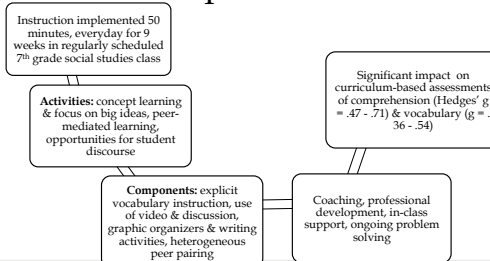

"In this story a bus driver asked Rosa Parks, an African American woman, to give up her seat to a white person. The author gives us clues about the type of person Rosa Parks was. The author writes that Rosa stayed in her seat; she was quiet and did not resist the police when she was arrested and fined 10 dollars. Based on these clues I would say Rosa was brave or courageous because she knew what the bus driver asked her to do was wrong and unfair, so she showed bravery and courage by staying in her seat, knowing she would be punished. Also, Rosa appeared calm, as she did not struggle when the officer arrested her."

65

Baker et al., 2014

ECRR
EVIDENCE-BASED CURRICULAR RESEARCH

Effects on adolescent comprehension

Vaughn et al., 2009

ECRR
EVIDENCE-BASED CURRICULAR RESEARCH

Summary

- Recommendations are all specific ways to increase and diversify opportunities to respond for whole group, small group, and peer activities, as well as provide needed supports.
- Free evidence-based activities at wordgen.serpmedia.org

68

Questions

http://padlet.com/adrea_truckenmi/OSPA

69

Aligning assessments with decisions

Assessments need to demonstrate reliability and validity for the decisions in which they are being used at YOUR school

70

Assessments & decisions

Decision	Assessment	Example
Who needs more intensive instruction?	Screening score	MAP RIT score RAPID reading success probability Fails state test
What type of instruction does the student need?	Percentile ranks (look at student's strengths & weaknesses) from diagnostic tasks OR Curriculum-embedded measures	MAP diagnostic RAPID percentile ranks
How do we know if the student made progress?	Growth-sensitive score from screening or diagnostic tasks	MAP RIT score RAPID ability scores
Which lesson or section within the curriculum does the student(s) need?	Curriculum-embedded formative assessment	Curriculum placement assessment SRA check-out

71

Reliability

- Reliability is most critical
- Reliability is an average and not a stable number
- How are form effects dealt with?
 - Equating
 - Multiple probes
- Administration error (Cummings et al., 2014)
- **Take-away:** reliability is different for each individual student at each time point and the observed score has many sources of error

72

Validity

- When making a decision, know the validity data that matches that decision
 - Screening <http://www.rti4success.org/>
 - Progress monitoring <http://www.intensiveintervention.org/>
- Predictive validity is an average
- There will always be a percentage of students misclassified
- Classification accuracy
 - is dependent on base rates (% students passing the outcome assessment)
 - can be changed by using a different cut-point

73

Validity

- You can calculate the classification accuracy in your school, with your screening & outcome measure, and your base rate

		Outcome	
		Failed outcome	Passed outcome
Screening	Failed screening	# true positive (a)	# false positive (b)
	Passed screening	# false negative (c)	# true negative (d)

Sensitivity = $a / (a + c)$
Specificity = $d / (b + d)$
False positive rate = $b / (b + d)$
False negative rate = $c / (a + c)$
Positive predictive power = $a / (a + b)$
Negative predictive power = $d / (c + d)$
Overall classification rate = $(a + d) / \text{total}$

National Center on Response to Intervention (2013).

74 Schatschneider, Petscher, & William (2008)
Truckenmiller et al. (under review)

Validity

- Risk can be more precisely conceptualized as a continuum: the likelihood that a student will pass

Best instructional practices

Skill by treatment

NOT aptitude by treatment

- Direct intervention: targets academic skill that is observed in the natural environment
- Extensive research base
- Indirect intervention: targets cognitive processes (sequencing, style, working memory)
- No established empirical effectiveness for academic skill problems

76

Shapiro, 2004, p. 25

Questions

http://padlet.com/adrea_truckenmi/OSPA

77

Differentiating instruction

Evidence-based recommendation from IES practice guide: Provide time for differentiated reading instruction for all students based on assessments of students' current reading level (Gersten et al., 2009)

78

Differentiating instruction

- After a whole group lesson:
 - Peer groups,
 - Centers,
 - Teacher-led small groups that may also be intensive
- Core curriculum
 - Differentiated instruction component
 - Supplementary materials
 - Tier II

79

84

FCRR
Florida Center for Reading Research

Steps

- Form flexible groups based on data
 - Can use DIBELS or curriculum-embedded
 - Re-shuffle groups based on skill mastery
 - Consult with reading coach if needed
- Identify appropriate center activities
- Design a center management system
- Teach the activities with explicit instruction
- Organize the classroom
- Manage transitions
- Establish accountability

85

Kosanovich, Weinstein, & Goldman, 2009

Watch – example groupings

- Introduction

86

Aligning center activities to CCSS

Tool	Web link
Search for activities by strand	http://www.fcrr.org/for-educators/sca_cc.asp
Crosswalk activities by standard	http://centeroninstruction.org/student-center-activities-aligned-to-the-common-core-state-standards
Progression of skills needed to meet the CCSS Foundational Skills standards	http://centeroninstruction.org/files/Building%20the%20Foundation.pdf

87

Key considerations

- Plan for classroom management
- Match groups of students with skills, **GRADE LEVEL CAN BE IGNORED**
- Plan for systemic support for use of center activities or other small group activities
- Use the teacher resource guides
- Use the activities as extra practice and NOT independent learning

88

Classroom management

- Teach routines explicitly: taking turns, when a problem is encountered, cleaning up, quick transitions
- Explicitly incorporate school-wide or classroom expectations, acknowledgment system, & consistent consequences
- Monitor participation for behavior, errors, mastery
- Consultant/coach ask about behavior issues during follow-up

89

Watch - routine

- Introduction
- Frequently Asked Questions
- Implementing Activities, 1-100
- Implementing Activities, 10-1000
- Integration of Activity Maps, Crosswalks, Glossary
- Acknowledgments

90

Early completion activities

- Extension activities on the SCA lesson
- Puzzles
- Magnetic letters & boards
- Research library

91

ECRR
EDUCATION CENTER FOR READING RESEARCH

Grade labels NOT needed

- The grade level label is based on when schools typically teach the skill and is NOT a label for the student
- Use the extension activities for older students
- Adjust the activity by requiring a written response instead of oral
- Use the activity with core text or words

92

ECRR
EDUCATION CENTER FOR READING RESEARCH

Considerations for support

Ohio schools

Involve others

-
-
-
- Parent volunteers to make packets or monitor
- Use in afterschool or summer program
- Interns, practica students, volunteers, mentors, peer tutors

93

ECRR
EDUCATION CENTER FOR READING RESEARCH

Activity

- Which grade levels and teachers will implement differentiated instruction and during which content area?
- What materials do these teachers need?
- What orientation and training do these teachers need? When will it occur?
- What supports do the teachers need?
 - Who is responsible for providing follow-up question-answering, consultation for classroom management issues, observations? When?
 - Specifically, what will administration do to make this a priority?
- Add progress update as agenda item to leadership team's regular meeting agenda.

94

ECRR
EDUCATION CENTER FOR READING RESEARCH

Differentiating in secondary

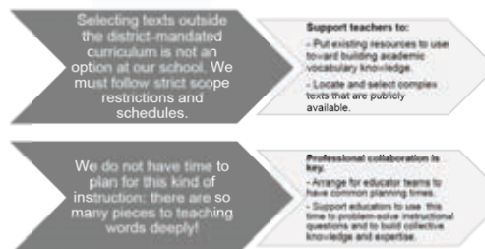

- Heterogeneous peer pairing
- Small groups with different levels of text on a similar topic
- Read 180 rotation
 - Whole group teacher directed instruction
 - Individualized computer-assisted instruction
 - Teacher-directed small homogeneous groups
- Reciprocal teaching in groups

Example from Tampa, grades 6-8

Progress Monitoring Assessments	Date(s)	If	Then	Programs/Materials/Strategies
Grades 6-8 Administer F AIR-4'S for students scoring below expectations on the state accountability assessment.	Assessment Period 1: August/September 2014	Student's Probability of Literacy Success (PLS) score is 84% or less (Yellow or Red Success Zone)	WRT is below 30th percentile <ul style="list-style-type: none"> Assess fluency (rate, accuracy and expression) through having the student orally read a passage. If the student reads fluently, then work on comprehension strategies. If the student struggles with reading fluently, then work on strategies addressing fluency (rate and accuracy). If the student has a high error rate, provide instruction in basic phonics (letter/sound patterns, syllable types, etc.) 	If a student's scores indicate difficulties with word recognition (WRT, fluency) only. Expert 21; Rubicon Issues21; Literacy Design Collaborative; Classroom Novel Sets; Classroom Libraries; Comprehensive Instructional Sequence
	Assessment Period 2: January 2015		VKT is below 30th percentile <ul style="list-style-type: none"> Provide instruction in base/root words and prefixes/suffixes. Provide other intensive vocabulary instruction. 	If a student's scores indicate difficulties with oral language (VKT, SKT) only. READ180/Rubicon Issues21; Literacy Design Collaborative; Classroom Novel Sets; Classroom Libraries; Comprehensive Instructional Sequence
	Assessment Period 3: April 2015		SKT is below 30th percentile <ul style="list-style-type: none"> Provide explicit instruction in sentence construction and determining how clauses and ideas relate to one another throughout a text. 	If a student's scores indicate difficulties with both decoding (WRT) and oral language (VKT, SKT). Academy of Reading; MCL; S.P.I.R.E.; Literacy Design Collaborative; Classroom Novel Sets; Classroom Libraries; Comprehensive Instructional Sequence

Activity #4	Who needs instruction?	What materials or resources will we use?	What additional materials or resources do we need?	
Alphabets Decoding, phonics, phonology, morphology, spelling				Differentiated
				Intervention
Oral language word meanings, academic language; morphology, syntax, grammar, cohesion				Differentiated
				Intervention
Comprehension connected text, text organization & structure, strategies, metacognition				Differentiated
				Intervention
