Courtney L. McLaughlin, PhD, NCSP, is Associate Professor and Director of the School Psychology Ph.D. Program at Indiana University of Pennsylvania (IUP). Dr. McLaughlin gained experience working in a psychiatric center on a Residential Treatment Facility, in a classroom as a substitute teacher, and as a school psychologist for two school districts. Additionally, Dr. McLaughlin has consulted with school districts across the United States. Dr. McLaughlin has published and presented on topics related to school-based mental health including: school-based mental health systems, social media and mental health, geography and mental health, children and adolescents at-risk, and training future school psychologists. She has served as an ad hoc reviewer for professional journals and serves as a Senior Associate Editor for School Psychology International.

Objectives

Professionals in the schools see and experience the need for mental health services every day. Therefore, it comes as no surprise that one in five children ages 13 to 18 years of age will struggle with a mental health problem (Merikangas, et al., 2010) and 13% of children between 8 and 15 years of age had a diagnosable mental health problem within the last year (Center for Disease Control and Prevention, 2012). Furthermore, we often catch children too late. This presentation is designed to provide information for attendees with relevant background on School-Based Mental Health Systems to support them in thinking critically about the mental health services offered within their districts. Participants will be challenged to determine the additional pieces they need to better service children in need of supports and to prioritize what their districts may be able to do to move toward a more comprehensive continuum of services. Participants will engage in this presentation through large group, small group, and partner activities.
